Estadística del valor de maíz (corn) exportados desde USA hacia Centroamérica (2000 – Agosto 2023).

Data tomada de: United States Census Bureau.

U.S. Census Bureau at a Glance

How well do you know the 50 states?

The Census Bureau is the federal government's largest statistical agency. We are dedicated to providing current facts and figures about America's people and economy. Federal law protects the confidentiality of all the information the Census Bureau collects.

OUR STATISTICAL PROGRAMS

Censuses

- The **Decennial Census** is the once-a-decade population and housing count required by the U.S. Constitution. The Census Bureau counts all 50 states, the District of Columbia, Puerto Rico, and the Island Areas. The results of the decennial census determine the number of seats for each state in the U.S. House of Representatives and are used to draw congressional and state legislative districts and to distribute hundreds of billions of dollars in federal funds each year.
- The **Economic Census** measures the nation's economy every 5 years, providing vital statistics for virtually every industry and geographic area in the country.
- The **Census of Governments** provides comprehensive data about the nearly 90,000 state and local governments in the nation every 5 years.

Surveys

- The **American Community Survey (ACS)** is an ongoing annual survey that shows what the U.S. population looks like and how it lives. The ACS helps communities decide where to target services and resources.
- **Demographic surveys** measure income, poverty, education, health insurance coverage, housing quality, crime victimization, computer usage, and many other subjects.
- **Economic surveys** are conducted monthly, quarterly, and annually. They cover selected sectors of the nation's economy and supplement the Economic Census with more frequent information about the dynamic economy. These surveys yield more than 400 annual economic reports, including principal economic indicators.
- **Sponsored surveys** are demographic and economic surveys that we conduct for other government agencies. They include the Current Population Survey, the National Health Interview Survey, and the National Survey of College Graduates.
- The **Small Business Pulse Survey** provides detailed information on the effect of the COVID-19 pandemic on small businesses as well as their participation in federal programs such as the Paycheck Protection Program.

Our Mission

The U.S. Census Bureau's mission is to serve as the nation's leading provider of quality data about its people and economy.

Our History

Thomas Jefferson directed the first census in 1790. As required by the U.S. Constitution, a census has been taken every 10 years thereafter. In 1840, the Census Act authorized the establishment of a centralized Census Office. In 1902, the Census Office became a permanent organization within the Department of Interior. A year later, it was renamed the Bureau of the Census and moved to the new Department of Commerce and Labor.
